

New 1000 Watt 1U-High Power Supply

PowerGate LLC introduces the RSP-1000 Series of Low Profile, 1000 Watt Switching Power Supplies. The small size of these power supplies, measuring only 5.00" x 11.61" x 1.61", make these products an ideal solution for Industrial, ATE, Datacom, and Telecom applications where high-density and high-power are both required.

The RSP-1000 Series consists of 5 models offering single output voltages of 12/15/24/27/48 VDC. The supplies feature universal AC input with Active PFC and 5V/500mA standby power. Up to four supplies can be connected in parallel with built-in DC cooling fans, remote sense, DC OK signal, remote on/off control, and active current sharing for scalable power or redundant power applications (up to 3+1). The supplies are RoHS/Lead Free Compliant, have been qualified to meet EN55022 Class B emission standard, have been safety approved to UL/cUL60950-1, TUV EN60950-1. In addition, they have the CB Report EN609501 and bear the CE Mark (LVD).

Sample units are available from stock with production lead time of 6 to 8 weeks (typical). Complete specifications are available for download from www.powergatellc.com/pdfs/RSP-1000.pdf. Standard pricing is as low as \$252.00 for 250 piece quantities with a three-year product warranty. Contact PowerGate directly for sales and application support at sales@powergatellc.com or (866) 588-1750.
