

## **New 60 Watt Power-Over-Ethernet Desktop Power Supply.**

PowerGate LLC introduces the Cincon TR60A Series Power-Over-Ethernet power supply that is rated at 60 watts (48 volts at 1.2 amps). The device allows both power and data to be carried over a single Ethernet cable, enabling remote access points to operate entirely from the power it receives through the data cable. These supplies eliminate the need to run 110/220 VAC power to Wireless Access Points and other devices on Ethernet wire. This solution is ideal for applications such as wireless multi-radio access points with A,B and G standards and IP phones with streaming video displays.

The TR60A Power-Over- Ethernet Injector Power Supply delivers 48VDC with up to 1.2 Amps of current in an external, UL94V-0 rated desktop package that measures only 5.91 x 2.76 x 1.36". This product features Universal AC Input, Over-Voltage Protection, Short Circuit Protection and a two-year warranty. The Product is rated for convection cooled operation with a -20~ +40°C Full-Load Operating Temperature Range. The supplies have been qualified to meet CISPR 22 / EN55022 Class B Emission Standards and are approved to the International Safety Standards of UL 60950-1, TUV EN60950-1, CSA 22.2 No. 60950-1 and Bear the CE Mark (LVD). Products are manufactured to satisfy the latest RoHS / Lead Free Initiatives.

Sample units available from stock with production lead time typically 5 to 7 weeks. Complete Specifications are available for download from [www.powergatellc.com](http://www.powergatellc.com). Standard pricing is \$28.50 for 500 piece quantities. Contact PowerGate directly for sales and application support at [sales@powergatellc.com](mailto:sales@powergatellc.com) or (866) 588-1750.
